### the babyTEL service

babyTEL® provides a fully-featured telephone service over your **existing high-speed internet** connection. You no longer need to pay for a traditional phone line from the telephone company.

You simply hook up your **regular telephone** through the 'babyBOX'™ to your Internet connection and make and receive calls as you normally would. **Keep your existing telephone number or receive a new number (including 800#s)** to receive incoming calls.

Features such as call waiting and caller ID are all included in the service with many more free features to come.

Also included is babyMAIL™ an advanced and fully-featured voicemail service. babyMAIL gives you the option of retrieving your messages from any telephone or from your email inbox.

June 15, 2004 babyTEL announced the beginning of the end of long distance charges in Canada.' You can now call coast-to-coast to any 'Canadian Village'™ city as a 'local' call. A call from Montreal to Vancouver or Kitchener to Toronto is now the same as a call from Toronto to Toronto. All calls between babyTEL® users are **free**.
